

DuraLabel[®] PRO = Endless Possibilities

The DuraLabel PRO Thermal Transfer Printer

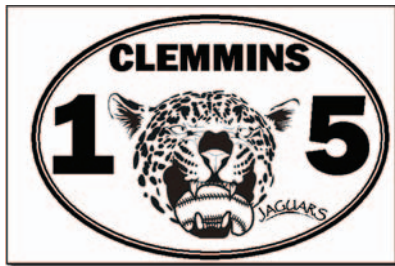

is a great way to get everyone involved. It gives you the tools to efficiently make your school a more informed, organized and safe environment for students and faculty. Supplies come in a wide selection of colors and sizes to help you create signs and labels in a multitude of color combinations. With the system's capabilities and your imagination, you can do wonders. It's quick, safe and easy to use. Call us today for more information and see why every school should have a DuraLabel PRO.

MOTIVATE

Specialize & Customize!

Create educational games and much more using labels printed on the DuraLabel Pro. It allows the ability to customize awards for immediate recognition for a job well done. The DuraLabel PRO is a great tool for building faculty and student involvement while providing a clear, concise means of communication!

Oval die-cut vinyl blank labels, makes it quick and easy to label sporting equipment, such as helmets.

COMMUNICATE

Identify, Inform & Organize!

The DuraLabel PRO is a quick and simple way to label items around the school for more productivity and safety among students and faculty. It's a great way to customize signs and labels for your specific and immediate needs.

EDUCATE

Learn while having fun!

Nothing is better than a student having fun while learning. In just minutes, teachers, trainers and administrators can make labels, game pieces, projects and much more with the DuraLabel PRO. It's a great way to enhance classroom learning.

SUPPLIES

Vinyl comes in an assortment of colors in rolls of 4", 3", 2", 1", and 1/2" wide. Ribbon comes in eight different colors: white, black, green, orange, red, yellow, blue and dark blue. Both vinyl and ribbon are designed to last for years indoors or outdoors and can even withstand chemicals and cleaners. This is great for classrooms like science laboratories, wood shop, shop class or any other area where your labels will be subjected to a harsh environment. We stock specialty supplies such as oval die-cut labels (shown to the left) as well as reflective vinyl, static cling and phosphorescent (glow-in-the-dark) vinyl. These are great for low-light environments such as auditoriums and storage closets, or for temporary window signs. Other specialty supplies are available and can be viewed at our web site: www.DuraLabelPRO.com.

Basic Vinyl & Ribbon Colors
