

Electrical & Safety Labeling

DuraLabel Specialty Supplies for wire marking & electrical safety purposes!

DuraLabel®

Industrial Sign & Label Printers

Do you need wire markers, labels & signs for electrical labeling purposes?
With the DuraLabel Specialty Labeling Supplies, you can label in almost any environment for most electrical applications.

Arc Flash "Warning" & "Danger" Die-Cut Labels - Arc Flash Labeling

Arc Flash die-cut labels are resistant to UV-light, common industrial chemicals and water. Various sizes up to a 7" x 10.5" are available for the DuraLabel PRO series of printers and the DuraLabel 7000 wide format sign and label printer. May be used indoors or outdoors. Customize your message and save for later with the included Arc Flash Labeling Database Software. Print labels in English, Spanish and French.

Common Applications: Arc Flash Labeling

Shrink Tube - Wire & Cable Marking

Durable, flame-retardant, radiation-crosslinked heat-shrinkable polyolefin. Has a 3:1 shrink ratio. Ideal for wire and cable marking. Print identifying information and logos. Various sizes available to identify and organize the wires and cables in your facility.

- UL 969 recognized: standard 224, file E35586
- CSA certified: CSA C22.2 No. 198, file 31929
- Military compliance: MIL-DTL - 23053/5, MIL-M-81531, MIL - STD-202

Wire Wraps Self-Laminating - Wire & Cable Marking

These self-laminating wire wraps are simple-to-use. Print the identifying information, apply to the wire or cable, then wrap the clear "tail" around protecting the identifying information on the label. Available in multiple colors for color coding.

Common Applications: Wire, cable, hose, tubing and conduit marking.

ESD Electrostatic Dissipative - Equipment & Electronic Labeling

Produce superior quality labels and protect static sensitive equipment. DuraLabel PRO electrostatic dissipative (ESD) tape prevents static charges from building up during label printing and application. This provides high quality, void-free printing and protection for sensitive electronic equipment. Perfect for use in areas sensitive to electrostatic discharges. This 2.0-mil silver polyester has a smudge-resistant top coat that is highly resistant to abrasion and static-induced print head voids. Has a service temperature of -40 F to over 300 F. **UL-recognized under UL 969**

Application Locations: Energy sensitive equipment and static-prone environments.

UL Label Stock - Equipment & Product Labeling

Our UL label stock is available in white and clear. When used with our DuraLabel standard black ribbon, labels are UL 969 approved making them ideal for product labeling. (UL 969 recognized: standard 224, UL file # PGJ12.MH16635)

Safety Signs & Labels Do you need labels and signs for facility safety purposes? With the DuraLabel Specialty Labeling Supplies, you can label in almost any environment for safety applications. All supplies on this page may be used indoors or outdoors.

DuraTag™ Tag Stock - Valve Tagging & Labeling

This supply is a multi-ply cross grain material making it extremely tough. Although it is flexible it is so tear-resistant that grommets are not needed for most applications. Available in a variety of colors for color coding and in various sizes for the DuraLabel PRO printers and the DuraLabel 7000 wide format sign printer.

Common Applications: Valve tags, pipe markers and other safety applications.

Lockout/Tagout Two-Color Tags - Lockout/Tagout Tags

Candy striped for quick easy recognition and with a standard Danger header, these tags are made with our DuraLabel PRO DuraTag material making them extremely durable and ideal for Lockout/Tagout applications. They are UV-stabilized and clay-coated for durable printing. Flexible material, resistant to moisture and chemicals that may be used in extreme temperature conditions. Impervious to tears, and so tough that grommets are not necessary. Simply punch a hole and apply with a zip-tie.

Common Applications: Lockout/Tagout tags, and other safety applications.

Extended Life Vinyl - Safety Signs

DuraLabel PRO Extended Life Vinyl has an outdoor life of 8 years which is perfect for labels which will not be replaced for years. Benefits of this supply include self-extinguishing capabilities and complies with RoHS.

Common Applications: Safety signs and labels

Two-Color Vinyl - Safety Signs

DuraLabel PRO striped vinyl is designed to comply with OSHA, ANSI, NFPA and other label and sign codes and standards. Two-color vinyl is resistant to alcohol solvents, cleaning agents, UV light, humidity, water and oil. Suitable for indoor and outdoor use. Common stripe colors include red, orange, yellow, blue and green in different stripe widths and vinyl sizes. Please call 1-800-788-5572 for custom colors and vinyl sizes.

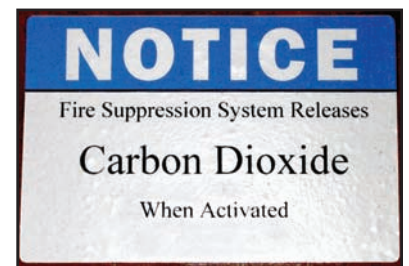

Common Applications: Arc Flash labels, Safety signs and labels

“Danger” & “Notice” Die-Cut Labels - Safety Labeling

Customize any safety message with the DuraLabel PRO die-cut labels, headers with Notice and Danger in either English and Spanish. Suitable for indoor or outdoor use.

Common Applications: Safety signs

Master Lock Safety Series Products - Facility compliance

We carry the complete line of Master Lock safety series products. Get OSHA compliant padlocks, hasps, lockout kits, stations and more.
