

Temporary Labels & Signs
DuraLabel Specialty Supplies which may be removed & reused over & over!

DuraLabel®

Industrial Sign & Label Printers

Magnetic

Print on this high-quality magnetic supply which may be used over and over again without the sticky residue. Print crisp, legible barcodes, identifying information and more on this reusable magnetic supply. Apply to any ferromagnetic metal surface.

Common Applications Include:

- equipment
- shelves and racks
- metal drums and tools
- vehicles
- doors

Static Cling

The DuraLabel Static Cling supply does not use adhesive to affix labels and signs to applications. You may apply over and over without damaging your message or the surface to which it is applied. This supply is very durable and the topcoat provides abrasion and scratch resistant printing.

Common Applications Include:

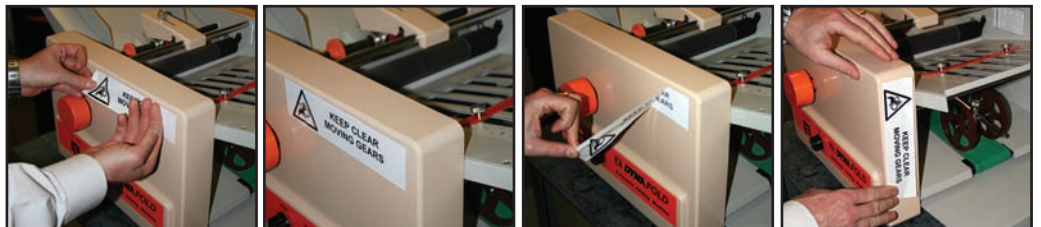

- window signs
- vehicle labels
- for locations where you don't want the surface to be damaged.

Repositionable

The adhesive of DuraLabel PRO repositionable supply is designed to adhere the same as our regular vinyl, but may be removed without the glue-residue. Labels and signs may be applied and removed multiple times. This supply stands up to most mild acids, alkalis and salt solutions.

Common applications include:

- identifying temporary inventory
- maintenance projects
- temporary work stations
- work-in-progress
- items in need of repair

Specific Application Labels
DuraLabel Specialty Supplies for Ispecific labeling applications!

DuraLabel®

Industrial Sign & Label Printers

Arc Flash “Warning” & “Danger” Die-Cut Labels

Arc Flash die-cut labels are resistant to UV-light, common industrial chemicals and water. Various sizes up to 7” x 10.5” are available for the DuraLabel PRO series of printers and the DuraLabel 7000 wide format sign and label printer. Print in labels English, Spanish and French. Customize your message and save for later with the included Arc Flash Labeling Database Software. May be used indoors or outdoors.

- NEC compliant
- NFPA 70E 2009 compliant

RTK/NFPA Die-Cut Labels

RTK Die-cut labels are available in NFPA Diamond and RTK Color Bar formats. Various sizes up to 7” x 10.5” and layouts are available for the DuraLabel PRO printers and the DuraLabel 7000 wide format sign printer. May be used indoors or outdoors.

- OSHA standard 1910.1200

Tamper Evident Labels - “Destructible”

This tamper evident supply breaks apart like dry paint when it is removed. This prevents the label from being reused and reveals that the label has been removed. Resistant to common cleaning solutions and is waterproof. May be applied to temperatures ranging from -40 °F to 212 °F.

Tamper Evident Labels - “VOID”

Provide security and peace of mind The DuraLabel Tamper Evident “VOID” tape is ideal for tamper evident labeling. Multiple rows of “VOID” are left indicating the item has been tampered with and preventing re-use of the label.

Common Applications Include:

- identify unwarranted entry to shipped packages
- serial numbers
- laboratory vials, bottles and test tubes
- bar code labels

Circuit Board Labels

Circuit Board Labels are made up of high-temperature polyimide which has a 2.0 mil topcoat to endure wave soldering and standard acidic solvents. It provides a high Print Contrast Signal (PCS) ideal for scanning condensed barcodes.
