Graphic Products & DuraLabel®

Graphic Products, Inc. has proudly been serving our customers since 1970 with efficient and reliable identification and communication products. Read what some of our customers have to say about some of our products and services.

Testimonials

"We did a thorough review of the various printers, and selected the DuraLabel PRO 300 as our internal product of choice. It's easy to use, supplies are in-expensive, and the support is by far the best of all the printer manufacturers we've dealt with."

Darcy / Manager

"Thanks for the information regarding pipe marking you supplied. It has helped out in marking the pipes in our chemical - acid etching area of our shop. I like the idea of your products (Duralabel Pro printers) having the software. Thanks again for your time and effort."

Bruce / Metal Components Manufacturer

"Thanks for the help the other day with the Duralabel label maker. I really appreciate the fast and courteous assistance that I receive when I need to call the help line. Having the label maker on site has been a plus. I install new equipment in the plant. It is very nice to be able to place professional signs on the equipment as it is installed. Waiting for signs can slow down the momentum of a project. It is really nice to be able to pop on the computer and within minutes have a quality sign ready for use.

Proper signs make it easier for every one to learn how the equipment is run and figure out what is going on. Several other departments have "borrowed" the label maker for things that they needed labeled. The warehouse was recently expanded and I made about a hundred labels for the shelves in 10 minutes."

Natalie / Engineer at a Gold Mine

"It is way more user friendly and you can immediately see what your label looks like prior to printing. I love the email-able templates you have to choose from or customize. We standardize between other locations by forwarding them with directions to all the end-users so all the plant locations are doing the same thing. What was taking me 4 hours before now takes me only twenty minutes with the DuraLabelPro system. Thanks for all your assistance in helping us with the set up it was real easy and love making labels with it. I use it every day.

Thanks again."

Martha / Tool Room Manager
