

# Mobile Print Station™ 150 XL

Thank you for purchasing the Mobile Print Station™ 150 XL label design platform. To begin printing immediately, follow these steps. Note: This quick start guide assumes a DuraLabel printer is available and loaded with supplies. If this is not the case, refer to the printer manual for instructions.

## QuickStart Guide:

**1.** Unpack the MPS 150 XL and verify that the following components are present and undamaged:

- MPS 150 XL
- AC adapter
- Battery pack
- Mini optical mouse
- QuickStart guide
- USB Thumb Drive 256 MB (disk drive for loading templates or backup)
- User's guide

**2.** Insert the battery pack. Turn the MPS 150 XL over so the bottom side is facing up, and slide the battery pack into the rear of the MPS 150 XL until the battery spring lock snaps into place. The red mark is no longer visible. Turn the MPS 150 XL over to rest on the bottom side.

**3.** Connect the MPS 150 XL to a power source using the supplied power adapter. Plug the adapter into the power outlet, and then insert the other end of the cord into the power port located on the right side of the MPS 150 XL.

**4.** Connect the MPS 150 XL to a DuraLabel printer using the USB cord. Insert the flat plug into USB port 1 (located on the left side of the MPS 150 XL) and the other end of the cord into the label printer. Power ON the printer.

**5.** Open the MPS 150 XL display panel and press the power switch located at the top right hand of the keyboard to power ON the MPS 150 XL.

**6.** At initial power ON, a one-time opening will ask to set time, time zone and printer.

**7.** To begin designing labels, use the touchpad to select from the MPS Toolbar at the top of the display. From the Templates pull-down menu, double-click to select a label size. In the window that appears, select a label template and click Open. The template will open in Label Writer, which functions like a word processor to format labels and enter text or graphics. For more information on using Label Writer, refer to the user's manual included with the MPS 150 XL.
